

BE PREPARED EQUIPPED & CONFIDENT

B L AID+ Ballistic Advanced Incident Defence System

B L AID+

B L AID+ is a wearable first aid & trauma pack that protects against shootings, stabbings, and shrapnel from blasts. It is the first ballistic protection of its kind, enabling both first responders & workplace first aiders to treat casualties during a major incident.

This revolutionary first aid system provides users with both protection and confidence. It can be customised according to individual or organisational needs, but typically includes the following:

- Personal respirator for self-rescue during emergencies involving hazardous smoke and fumes
- VizShock personal attack alarm system. The multi-frequency red and blue pulse allows you to pause and deter your assailant
- Medium BS8599-1 first aid kit for high-risk workplaces with up to 25 employees
- Catastrophic trauma kit. A holistic and effective system to stop lethal bleeds in an emergency. The equipment includes improvised and optimised items to enable the treatment of multiple casualties

B L AID+ comes with a free e-learning course for up to 12 people that demonstrates how to use the ballistic bag.

BENEFITS

- ▲ 100% DuPont™ Kevlar® ballistic and stab protection
- ▲ 100% MicrAgard™ PLUS material
- ▲ Complies with NIJ0101.04/IIIA, STANAG 2920 V50.580m/s and KR2/SP2 knife and spike protection standards
- ▲ Complies with medium workplace BS8599-1 first aid kit requirements
- ▲ Suitable for offices, schools, shops, pubs, entertainment venues and anywhere else where people gather
- ▲ Ideal for first responders, corporate first aiders, security personnel, public facing lone workers, aid workers, journalists and anyone travelling to volatile areas

OUTER SHELL

The MicrAgard™ PLUS outer layer complies with approved standards within both the airline and medical sectors. Here are some of the recognised benefits:

Antimicrobial

Prevents cross-contamination of bacteria.

Fluid Repellent

MicrAgard™ PLUS repels fluids, keeping the equipment inside safe and dry.

Quality Assurance

For maximum quality assurance all our products are made to UKAS/ISO standards.

Lockable Zips

Zips can be locked through our trademark easy-pull zip pullers.

Fire Retardant

Engineered to withstand flames.

Non-rot Material

Non-rot, UV-stable material, meaning your bag can be recycled.

Heavy Duty Fittings

High quality, durable fittings for use in the most demanding environments.

Impact Resistance

The high tenacity material provides best in industry build quality and impact protection.

Comfort Straps

Carry it off in style and comfort! Securely fastened grab handles and strapping system engineered for maximum comfort when carried.

Thermo Care

Washable with mild soap and water and machine washable up to 40°C.

BALLISTIC INSERTS

Here are some of the benefits of the removable ballistic inserts that come with **B L AID+**:

Flexible

Consisting of a special multi-layered construction, our ballistic inserts are incredibly flexible and easy to insert.

Airport Friendly

Made with no metal, our removable ballistic inserts ensure you can be protected wherever you go.

Thin, Lightweight and Undetectable

The lightweight, ultra-thin construction makes carrying our ballistic inserts within the **B L AID+** system easy, undetectable and efficient to allow more emphasis on the equipment load.

Ballistic Level IIIA & KR2/SP2

All shields are tested to Level IIIA (gunshot) and KR2/SP2 (knife slash and stab) standards, making them one of the most impenetrable inserts of their kind. Each insert within the **B L AID+** system has a layered approach to provide a complete blanket of protection.

Pressure Tested and Rated

The **B L AID+** system is manufactured, tested and certified by the German government laboratory of Mellrichstadt. Further ballistic firearms testing has been completed by members of the UK armed forces with 9mm & 5.56mm calibre weapons from various ranges and proximities.

▲ Tailor-made to individual specifications and can be purchased empty if required.
